SKILLS

React

Node.js

MongoDB

Solidity

C++

Javascript

MySQL

Express.js

Ruby (Ruby on Rails)

Restful API and AJAX

SOFT SKILLS

Communication

Adaptability

Time Management

Problem Solving

Team Building

EDUCATION

B.Tech

Guru Gobind Singh IndraPrastha University, Delhi

2021 - 2025

CERTIFICATES

Java Programming Fundamentals (08/2021)

PERSONAL PROJECTS

Organ Donation on Blockchain

- Decentralized Organ Delivery System using Solana Blockchain. The proposed system digitalizes the process of Organ Donation, enhances the existing system by handling endless data, and makes it transparent and cost-efficient.

Campus Ambassador Portal.

- The proposed solution is that we use Node and Express JS to handle the back-end of our application with the help of these two, we are able to add functionalities in our web application.

Mars Delight, a restaurant on Mars

- Indulge in an otherworldly culinary experience at Mars Delight - where the flavors of the red planet meet the finest in dining. Experience the taste of a new world at Mars Delight - the premier restaurant on the red planet.

Report Card Generator

- The goal of this project is to create a Report Card Management System application to manage report cards and export them with ease. Front-end for the program is written in Python, which also interacts with MySQL Server in the back-end.

ACHIEVEMENTS

Solana Hackday Winner

Solana Hackday Winner'22 Solana Hackday was a 12 hour Hackathon organised on 19th November at IIIT Delhi and our Project was in the winning teams.
